NGUYEN THI NHU QUYNH

PROFESSIONAL SUMMARY

Final-year student majoring in Management Information Systems, expected to graduate in 01/2027. Experienced as a Business Analyst Intern and participated in system analysis and design projects. Skilled in requirement gathering, BA documentation (BRD, FRD, SRS), BPMN/UML modeling, and Wireframe/Prototype design. Seeking a Business Analyst Intern opportunity to further develop BA skills and contribute to real-world projects.

WORK EXPERIENCE

INOTEV Joint Stock Company
Business Analyst Intern

05/2026 - 08/2026

Project: E-commerce Platform

- Participated in requirement gathering, analysis, and clarification with stakeholders and team members.
- Prepared and maintained BA documentation, including BRD, FRD, and SRS.
- Created User Stories and Acceptance Criteria for system functionalities.
- Designed Wireframes and Prototypes using Figma.
- Modeled business and system requirements using BPMN, Use Case, Sequence, and Class Diagrams.
- Created functional test cases to support system testing and requirement validation.
- Collaborated with team members to clarify requirements and update documents.

ACADEMIC PROJECTS

Smart AI-based Cosmetic Recommendation System for BoCongAnh Cosmetics

01/2026 - 04/2026

Business Analyst

- Gathered and analyzed user requirements.
- Created Use Case Diagram for the system.
- Modeled business processes using Flowchart.
- Designed and specified user interfaces using Figma.
- Prepared Software Requirement Specification (SRS) documentation.

Result: Completed system analysis documentation and interface design for the cosmetic recommendation system.

Rabona Sport E-commerce Website

01/2026 - 04/2026

Business Analyst & Developer

- Gathered and analyzed user requirements.
- Conducted business analysis and modeled business processes using BPMN.
- Modeled the system using UML (Use Case Diagram, Activity Diagram) and designed database structures using ERD.
- Designed and specified user interfaces using Figma.
- Collaborated with team members to develop and complete the website.
- Planned and tracked project progress using Microsoft Project.
- Supported system testing.

Result: Completed an e-commerce website with product management, order management, and user interface features delivered on schedule.
